THES INSTRIUTION IS CONDUCT'ED by the sisters of St. Ann. The discipline of the School is mild, but firm and regular, strict attention to its regulations required at all times. The emulation of the pupils will be excited by every gentle menns, and their success rewarded by an annual distribution of premiums, previous to the Vacation, which will commence July 15th. The Scholastic year will open on the first of September. Difference of religion is no obstacle to admission into the institution, but whilst pupils are left without any interference to follow their own profession, good order requires that they should conform to the general regulations of the establishment.

Parents may rest assured that every extention will be paid to the comfort of pupils whilst the utmost care will be taken to mourish in their minds those principles of virtue and morality which alone can make education prolitable.

OUR FLOATING POPULATION---WHAT WE SHOULD DO FOR WHAT THEM. The close of the mining season for all bu a few claims favorably situated for winter work, is now not far distant. Already the first instalment of returning miners have made their appearance, and additions to their number may be expected from this out by nearly every steamer from the river. Some of these men have had no cause to regret their trip to the upper country. They have secured for themseves a competence Others have made enough to enable them either to try their luck again in the diggings, or embark in some quieterenterprise. But, a in every mining coutry, there will be found quite a number who have not been success ful and who are not far from being—to use an expressive mining phrase—" dead broke." Now it is evidently the duty of the people of these Colonies not to neglect the men who have been toiling amid the mountains and swamps of a rugged country like Cariboo to unfold the hidden wealth which there lies buried. They are a hardy, intelligent, energetic and valuable population which any country might well be proud of, and which we should endeavor by all means to retain. In order to effect this desirable object we must not stand idle and let things take their natural course. We must provide some at traction, both for those who have been lucky and those who have had the mistortune to be unsuccessful. Recreation and amusement should be provided for the one class, and plenty of employment for the other to enable them to recover some of thoir lost ground. Of places of amusement we have no doubt private enterprise will supply the demand. Theatre goers will this winter have an onportunity of witnessing some of the most prominent artists of the California stage But there is a great want of a different kind of recreation for those who may chose to spend their evenings more quietly, and, we may say, profitably. We want something in the shape of Mechanics Institute with a good library of books of instruction and amuse ment, and also that most necessary of all adjuncts in this country, a museum containing at least geological and mineralogial specimens. In connection with the institution we might have a course of popular lectures, both entertaining and instructive, similar to some of those we have had in previous years. It we had some such place of resort it would have the effect of keeping men out of something worse, and at the same time enable them to inform themselves upon many matters very necessary for them to know. If a few of our leading men were to concern themselves about the matter it would not be very difficult to organize something of the kind above suggested, by subscription. After that there would be little difficult in keeping it up. As regards the question of employmen there is certainly need for us to bestir ourselves if we do not wish to see men leave town for want of it. The Corporation has evidently done the greater portion of the work it had to accomplish at once. It is not

likely, therefore, that it can give work to many from this out. The Government is

therefore, the next public body we must turn to. It will be necessary for it to proceed as soon as possible with the works for which money has already been granted. The

large sum voted for the improvement of the

harbor should certainly be made to con-

tribute to the support of our men who are in want of work this winter. Why is the un-

dertaking not proceeded with? If a dredg-

ing machine be what is required we ought to

have had one out by this time, even if it were

constructed by our own machinists. Let

something be done at once that will give

work to our destitute miners ere they becom

disgusted with the country, and leave it in

search of what they may imagine a better.

If proper steps are only taken to retain our

population by affording them similar advan-

tages to what they may obtain in San Francisco, there is a possibility of our even re-

ceiving accessions from California. Should

the American Government seek to enforce

the draft in that State many would be likely

to leave it to avoid being drawn. Vancouve

Island and British Columbia are the only

places north of San Francisco, where non-

fighting men could go, so that we would

likely come in for our, share. The continu-

ance of the beef embargo, on account of the

would seem to indicate that the extension o

form, but on the contrary that it is intended

to be actively enforced in that State. This prospect is certainly not a pleasing one for an

American who has been all summer here, o

it may all the last three years toiling in the

diggings of Cariboo and who may wish to

spend the winter of the year "down at the

Bay" and will no doubt be not without its

we have the following additional interesting information, upon which we place implicit reliance.

The Welsh Company had got down their third shaft, and were again on the lead taking out good pay.

The Caledonia Company, who have spen so much money in prospecting their claim, and were lately taking out big pay, have un fortunately lost their shaft.

The Glasgow or Keelie Company, o the meadows, below the Richfield Company had struck a rich prospect. It was believed to be the best claim on the meadows.

There was supposed to be a rich lead through the meadows as far as Willow river. The Cameron Company were working three shafts, taking out from 180 to 190 oz. a day regularly. The dividends were from \$1400 to \$1800 a week to the share.

There were sixty-six men engaged on this claim and the daily expenses amounted to \$600 or \$700.

The Barker Company were making a weekly dividend of from \$1,000 to \$1,400 The Lillooet Company had lost their fifth shaft, but were certain of the lead running through their claim. They had commenced

their sixth shaft under the management of Mr. Jack, a competent Australian miner, and there was no fear of any further bungling. The Tinker company were taking out the biggest kind of pay on the Cameron line. The Arabia company were taking out from

Mr. Humphrey, the efficient Express agent, arrived yesterday by the steamer Reliance. The news is unimportant. The rich claims continue to yield about as usual. No new strikes of any importance. The quartz excitement continues, and many are out prospecting. There is every confidence felt in several of the leads already discovered. Provisions continue firm at prices last quoted. The road from the Mouth of Quesnelle is just about finished, and Captain Grant was discharging the men. A considerable number of men finished, and Captain Grant was discnarging the men. CARIBOO.

[FROM OUR SPECIAL CORRESPONDENT.]

RICHFIBLD, August 27th, 1863. Through the kindness of Mr. Elwyn, of the Gold Escort, I am enabled to send you some Cariboo news. While mentioning this fact, I think it advisable to advert to the Esco itself, in order that your readers, many of whom are so vitally interested in its exist-ence, may form some idea of the utility and general efficiency of this quasi military force. It would be useless to deny that the Escort n a strictly mercantile point of view has not nitherto paid expenses, and whether it wi nttherto paid expenses, and whether it will ever do so on its present basis is doubtful. No thinking mind will be astonished at this. Several causes combined have led to such a result. In the first place, the prime outlay necessary in equipping the men, building suitable stables for their animals, and promisitions at a time when overwarding. suitable stables for their animals, and pro-viding rations at a time when every article of food is enormously high, must necessarily be very great. The miners also, upon whose support the Escort relies, have not shown more confidence in its security as a means of transport than might have been expected. Very few men in the mines, even among the educated classes, like to part with large sums of money which they can always, with a little saloon in Cameron Town, at a cost of \$40,000. It is a magnificent building, and would
do credit even to Victoria.

Judgo Begbie laid the foundation log of
the Hospital on the 24th, in the presence of
the hon. Donald Fraser, Judge O'Reilly, Mr.
Flwyn, and others.

Elwyn, and others.

The Rev. Dr. Evans had finished his my gold by it; I won't incur the risk by sending my gold by it.' Such has been the con-

clusion which many miners arrived at some time ago. But a change for the better is taking place, and a feeling in favor of the permanence of the Escort is daily growing stronger. This second trip will prove the correctness of my assertion, for, as I am informed, Mr. Eylwin takes down some \$120,000 as an an analysis of the provided and the stronger takes 000, or nearly double the amount taken down One very important fact which is generally verlooked from its want of prominence deserves especial notice; it is this—two courts of assize in Carriboo have passed away,

of assize in Carriboo have passed away, and we are on the eve of a third, yet not a single case is or has been set down in the calendar. This is unprecedented. About the same time last year the community were startled and appalled by the commission of a horrible murder. Three unfortunate gentlemen left the Forks with a large amount of gold on their way down to Victoria. A short time after they had left their holds were found backed to pieces no Victoria. A short time after they had left their bodies were found hacked to pieces, no doubt for purposes of robbery, for the gold was gone. This tragedy was the forerunner of others, and a great state of insecurity prevailed throughout Central British Columbia. The well known fact that the miners carried down their own gold led to this. All is now changed. An Escort exists, and by it the robb is sout down. The same inducement changed. An Escort exists, and by it the gold is sent down. The same inducement therefore does not now exist to tempt marauders to commit crime. In itself too the presence of such an effective body of men has, independent of its practical use, a most salutary effect on the minds of evil-doers. To he Escort therefore may be attributed much of the security of life and property which pre-

of the security of life and property which prevails—not forgetting, however, that very great credit is due to the Supreme Judge of the colony for his fearless administration of criminal law, and the terror with which he has inspired the worst characters in the country. I have heard men boldly say, that, were it not for him, and were they in another country, they would speedily "settle" their adversary with a revolver.

Before quitting the subject, I may venture upon suggesting some alterations, which seem to me to be advisable: In the first place, a scale of charges should be adopted instead of the present uniform rate. The man who sends down \$50,000 should not be charged so much in proportion as he who

be offered to rich miners to send down their dust in large quantities.

In the second place, the Government might, with excellent effect, charge one per sent. export duty on all gold-dust above, say \$500, taken from the mines. This impost on \$8,000,000 (the amount expected to be obtained from the mines this year) would realize \$90,000. The Escort might then reduce its research that rate to two per cents, and every present high rate to two per cent., and every miner would be sure to avail himself of its

QUARTZ COMPANIES.

Mr. McLaughlin's partner, Mr. Wood, is going down with some good quartz specimens taken from a lead at Lowhee.

Nothing further has been divulged as to the locality of the very rich vein from which the specimens were taken by Mr. Pearce.

The Rt. Rev. Dr. Demers, R. C. Bishop with a missionary has arrived on the creek with a view to establishing a place of worship.

Ought News to BE CHRONICLED ?-We have occasionally had nonsensical charges levied against us by our contemporaries of filching from their columns. The public have an aversion to newspaper squabbles, and would feel no interest in learning how completely we could turn the tables, but the Express, of Saturday, acknowledging the great importance of the intelligence has a leading article on the subject wherein it great importance of the intelligence has a leading article on the subject wherein it coolly speaks of "our latest advices," with out ever having published those advices, plainly indicating that it never had any advices to publish. What we wish to know is whether news affecting to a certain degree every individual in the country is to be withheld from the public simply because another journal is enabled to make the first announcement, and the others are unwilling to give it the credit?

a doubt a rich lead of 700 feet, only 100 of which, at the upper end, have as yet been worked. At the lower end of this great claim the rich pay-dirt is found to be 70 feet wide and 14 feet deep, and as far as can be judged it runs the entire length of their ground, with but little variation in extent. ground, with but little variation in extent. R. R. R. RADWAY'S READY RELIEF

Proves its superiority to all other remedies, in relieving the sufferer of pain, at once. A few minutes is sufficient to convince the most skeptical of its marvellous powers. So swift is its ac tion in soothing the most violent pain, allaying irritation and inflammation, in transforming the rheumatic, the crippled, and bed-ridden, to the enjoyment of ease and comfort, in curing Dysen terry, Diarrhosa, and all internal and external pains, that patients ascribe its tallsmanic power to enchantment instead of the plain matter of fact results from its skilfully combined properties. Whenever there is pain use it,

WEAR STONACH, OPPRESSION APTER EATING, ometimes the stomach becomes so sensitive the it rejects even the simplest food; and in other nstances, digestion is so painful that the patients afraid to include the appetite. It is in cases like these that the tonic properties of BRISTOL'S SWGAR-COATED PILLS are most strikingly manirested. Mrs. Margaret McElroy, of Troy, New York, testifies that, for five years, she was unable to digest solid food-taking nothing but jellie rice, and arrow-root-and even these caused her so much uneasiness, that she was obliged to limit the quantity to a couple of ounces three times a day. She was terribly emaciated, and, to use her own words, "hardly cared to live." ing tried more than twenty modes of treatment she, at length commenced taking BRISTOL' SUGAR-COATED PILLS, and she states the resu as follows : "I am thankful to say that I am quit well. I cat heartily, sleep comfortably, have re-covered my flesh, and feel no pain. All this l owe to BRISTOL'S SUGAR-COATED PILLS, and carnestly recommend them to all who suffer from weak stomach. They are sure." They are put up in glass vials, and will keep in any climate All respectable druggists have them for sale. DEATH IN THE BLOOD -Yes, it is in the blood

detergents, BRISTOL'S SARSAPARILLA, and you are safe. No matter what the complaint, -- whethe scrofula, erysipelas, cancer, salt rheum, fever and ague, liver disease or bilious remittent fever, it is through the blood alone that the exciting cause can be reached. This great anti-poison neutralizes the aerid matter in the veins from which the most terrible disorders spring, and by which they are fed and aggravated. It strikes at the hydra coiled in the venous system, and exterminates i as surely and as swiftly as Herculès destroyed the hundred headed serpent of which mortal distem-pers are the antitype. Bear this in mind all who suffer, for it is religiously true. Or. HOSTETTER'S STOMACH BITTERS.

When the flame of life wanes and quivers from exhaustion, administer this famous restorative. It will once more become steady and strong. In the deblity which follows violent fever; in diarrhoren, dysatery, dyspeptic complaints and choling the weakness consequent upon natural decay, or resulting from free living or over exertion, and also in those painful and too much neglected ailments to which ladies are exclusively subject, the Bitters never fail to give permanent relief.—Sold by all Druggists and dealers everywhere.

HOLLOWAYS OINTMENT AND PILLS.—The treatment pursued by Professor Holloway for the cure of wounds and ulcers is the uost simple an certain in its effects, it has been tried by hundreds of thousands and never been known to fail; by the administration of an internal remedy (the administration of an external remedy (the Ointment), he heals wounds, ulcers, and the worst of external disorders. By this celebrated treatment, also, bad legs and ulcers are cured, even when they have been upwards of twenty years standing
